

Product Specification Sheet

Custom Team Banners

Custom Team Banners print on PVC Flex vinyl in two weights built for the venues where player banners actually hang. Both weights carry the same smooth, glossy surface finish that holds a headshot cleanly from edge to edge. This is the right product when your roster needs individual player layouts ordered in bulk.

Material

PVC Flex vinyl.

Smooth, glossy surface holds ink cleanly across a full player headshot without cracking or peeling.

Print Method

Eco-solvent or UV inkjet.

Ink bonds to the vinyl surface so colors stay crisp through sun, rain, and repeated handling.

Color Output

CMYK full color (the 4-color process using cyan, magenta, yellow, and black).

Reproduces team colors, jersey numbers, and skin tones accurately across every banner in the set.

Finishing

Brass grommets every 2 ft. Pole pockets and hem and heat weld also available.

Grommets cover most fence and wall setups. Pole pockets suit banners sliding onto a horizontal rod.

Size Range

Custom sizing across the full range your venue needs.

Banners wider or taller than 10 ft include a heat-welded seam to keep the face flat.

Indoor/Outdoor Rating

Rated for both. Outdoor banners with UV-resistant inks typically hold color 6 to 12 months.

That range covers most full sports seasons indoors or out.

Single/Double-Sided

Single-sided standard. Double-sided with a blockout liner available.

A blockout liner (a white layer between front and back prints) stops show-through on banners hung in open air.

Weight

11 oz or 16 oz.

The 11 oz suits gymnasium walls. The 16 oz handles outdoor fence lines where wind load is sustained.
