

Product Specification Sheet

Custom Breakaway Banners

Custom Breakaway Banners run on PVC Flex vinyl in two weights: 11 oz for indoor and lighter outdoor setups, 16 oz for open-air stadiums where wind load matters before the run-through. Sizes cover roughly 6 ft x 3 ft to 12 ft x 4 ft, wide enough for a full squad to hit the seam together.

Material

PVC Flex vinyl. Smooth, glossy surface takes ink without cracking and holds the perforated seam straight until contact.

Print Method

Eco-solvent or UV inkjet. Weather-resistant inks stay sharp through outdoor game-day conditions without fading mid-season.

Color Output

CMYK full color. Reproduces team colors, mascot art, and photo-quality graphics across the full banner face.

Finishing

Grommets (brass rings punched every 2 ft), pole pockets, or hem and heat weld. Choose based on your mounting setup at the entrance.

Size Range

6 ft x 3 ft to 12 ft x 4 ft. Banners with any dimension over 10 ft include a welded seam on the outer edges for structural integrity.

Indoor/Outdoor Rating

Rated for both. Outdoor ink life runs 6 to 12 months under UV, though breakaway banners are single-use and disposed after the run-through.

Single/Double-Sided

Single-sided is standard. Double-sided with a blockout liner (a white layer between front and back that stops show-through) is available when both faces need graphics before the tear.

Weight

11 oz tears more easily with less resistance. 16 oz holds its shape flat in outdoor wind before contact.
