

Product Specification Sheet

Custom Coming Soon Banners

Custom Coming Soon Banners print on PVC Flex vinyl in your choice of 11 oz or 16 oz. Both weights handle indoor and outdoor use. The 16 oz is the right call for storefronts and fences where the banner stays up through changing weather for months.

Material

PVC Flex vinyl.

A smooth, glossy outdoor surface that resists moisture and UV exposure across both weight options.

Print Method

Eco-solvent or UV inkjet.

Both methods bond weather-resistant inks directly to vinyl so colors hold outdoors without cracking or peeling.

Color Output

CMYK full color (cyan, magenta, yellow, and black combined).

Reproduces most brand colors accurately within the standard printing gamut.

Finishing

Brass grommets every 2 ft. Pole pockets (fabric sleeves along the top or bottom edge for rod mounting). Hem and heat weld (heat-sealed edges for frame-mounted installs).

Pick the option that matches your mounting surface.

Size Range

Custom sizes available.

Banners over 10 ft in width or height include a welded seam at no extra charge.

Indoor/Outdoor Rating

Rated for both.

Outdoor banners with UV-resistant inks typically last 6 to 12 months in direct sun. Indoor banners last longer.

Single/Double-Sided

Single-sided is standard. Double-sided uses a blockout layer (a white middle layer that stops ink from showing through to the back) so both faces print cleanly.

Weight

11 oz for indoor use or short-term outdoor display up to about 1 to 3 months. 16 oz for longer outdoor runs or locations with sustained wind.
