

Product Specification Sheet

Custom Now Hiring Banners

Custom Now Hiring Banners print on PVC Flex vinyl, a smooth, glossy outdoor material that resists moisture and keeps ink bonded through sun and rain. Two weight options cover indoor light-duty use and heavy-duty outdoor mounting. Choose 11 oz for sheltered or short-term placement, or 16 oz when the banner stays up through multiple hiring cycles.

Material

PVC Flex vinyl.

Smooth, glossy surface bonds ink tightly and resists moisture through months of outdoor exposure.

Print Method

Eco-solvent or UV inkjet.

Both methods produce weather-resistant color that holds outdoors for 6 to 12 months without fading or peeling.

Color Output

CMYK full color (cyan, magenta, yellow, and black combined to match most brand colors).

You receive a free digital proof before we print, so color accuracy is confirmed first.

Finishing

Brass grommets every 2 ft. Pole pockets and hem and heat weld also available.

Brass grommets are the fastest option for fence or wall mounting with zip ties or rope.

Size Range

2 ft x 3 ft up to 20 ft x 100 ft, fully custom.

Banners exceeding 10 ft in width or height include a welded seam for structural support.

Indoor/Outdoor Rating

Rated for both. Outdoor banners hold color 6 to 12 months in direct sun.

Indoor banners last longer because they avoid weather exposure entirely.

Single/Double-Sided

Single-sided standard. Double-sided uses a blockout layer (a white layer between front and back prints) to prevent show-through.

Order double-sided only when both faces are visible, such as a banner suspended above an entrance.

Weight

11 oz for indoor or light-duty outdoor use. 16 oz for heavy-duty outdoor locations or banners reused across multiple hiring cycles.

The heavier the weight, the longer it holds shape through takedowns and remounts.
