## Custom Baseball Helmet Decals

Custom Baseball Helmet Decals run on 4 mil white PVC calendar film with permanent adhesive and UV-printed color at 720 DPI minimum. Every decal is die-cut to your logo shape and sized for batting helmet shell panels, typically 2 to 4 in. Sweat resistance and adhesive grip on glossy ABS plastic are built into the material from the start.

### Material

4 mil white PVC calendar film, matte finish.

Thin but sturdy vinyl that conforms to the compound curves of a batting helmet shell without bubbling or cracking at edges.

### Print Method

UV printed (ink cures instantly under ultraviolet light on contact with the vinyl surface).

Produces a scratch-resistant, waterproof color layer that holds up through sweat, rain, and bat bag contact.

### Color Output

CMYK full-color at 720 DPI minimum.

CMYK (cyan, magenta, yellow, black) reproduces team logos and gradients accurately at small decal sizes.

### Finishing

Die-cut to custom shape, kiss-cut on backing sheet.

Your exact logo outline is cut through the vinyl only, leaving the backing intact for clean, tear-free peeling.

### Size Range

Custom sizes up to 58.5 in wide. Baseball helmet decals typically run 2 to 4 in to fit batting shell panels.

### Indoor/Outdoor Rating

Rated for indoor and outdoor use. Permanent adhesive and UV-cured ink hold through roughly 3 to 6 months of regular outdoor play.

### Single/Double-Sided

Single-sided. Printed face carries your design. Adhesive back bonds to the helmet shell.

### Adhesive

Permanent adhesive bonds firmly to glossy ABS plastic. Removable with low heat and slow peeling, leaving no scratch on the shell surface.
