

Product Specification Sheet

Custom Football Helmet Decals

Custom Football Helmet Decals are die-cut from 4 mil white PVC calendar film and UV-printed at 720 DPI minimum. They're built for the compound curves of a football helmet shell, and the permanent adhesive holds through a full season of outdoor play.

Material

4 mil white PVC calendar film with matte finish.

A thin, flexible vinyl that conforms to curved helmet shells without cracking or lifting at the edges.

Print Method

UV printed (ink cured instantly by ultraviolet light).

Curing locks color into the surface immediately, producing a scratch-resistant and waterproof finish.

Color Output

CMYK full-color at 720 DPI minimum.

CMYK (cyan, magenta, yellow, black) gives you accurate team colors across every decal in the set.

Finishing

Die-cut to custom shape, kiss-cut on backing sheet.

Die-cut follows your design outline exactly. Kiss-cut keeps the liner intact for clean, tear-free peeling.

Size Range

Custom sizes up to 58.5 in wide. Football helmet side logos typically run 3 to 5 in across.

Any shape is available. Bumper stripes and rear numbers are sized to your helmet model.

Indoor/Outdoor Rating

Permanent adhesive rated for indoor and outdoor use.

Water and scratch resistant through roughly 3 to 6 months of active season play.

Single/Double-Sided

Single-sided.

The adhesive back bonds to the helmet shell. The printed face carries your design.

Weight

4 mil vinyl thickness.

Thin enough to flex around a curved shell without adding bulk or affecting the helmet's fit.
