

Product Specification Sheet

Custom Lacrosse Helmet Decals

Custom Lacrosse Helmet Decals are die-cut from 4 mil white PVC calendar film with a matte finish and printed at 720 DPI minimum. They bond to ABS and polycarbonate lacrosse helmet shells and hold up through sweat, rain, and contact across a full outdoor season.

Material

4 mil white PVC calendar film, matte finish, permanent adhesive.

Thin enough to flex around compound helmet curves without cracking or bubbling at cage mount edges.

Print Method

UV printed, meaning ultraviolet light cures the ink instantly on contact.

The result is a waterproof, scratch-resistant surface that holds color through repeated outdoor exposure.

Color Output

CMYK full color at 720 DPI minimum.

CMYK (cyan, magenta, yellow, black) gives logos and numbers bold, accurate color at helmet panel scale.

Finishing

Die-cut to custom shape, kiss-cut on backing sheet.

Die-cut follows your exact design outline. Kiss-cut keeps the backing intact so each decal peels cleanly.

Size Range

Custom sizes up to 58.5 in wide. Most lacrosse side panel logos run 2 to 4 in.

We cut to your exact shape, building cage mount and vent clearance directly into the cut line.

Indoor/Outdoor Rating

Permanent adhesive rated for outdoor use. Holds through roughly 3 to 6 months of active outdoor play.

Sweat, rain, and contact do not lift the bond under normal seasonal conditions.

Single/Double-Sided

Single-sided only.

The printed face carries the graphic. The adhesive back bonds to the helmet shell.

Weight

4 mil total vinyl thickness.

Thin enough to sit flush near vent openings without adding bulk under cage hardware.
