

Product Specification Sheet

Custom Motorcycle Helmet Decals

Custom Motorcycle Helmet Decals ship on 4 mil white PVC calendar film with a matte finish, die-cut to the exact contour of your artwork. This is a thin, sturdy vinyl built to bond to curved polycarbonate, fiberglass, and ABS shells without cracking or lifting. It's the right choice for riders who want graphics that hold through road exposure and repeated cleaning.

Material

4 mil white PVC calendar film, matte finish.

Thin enough to conform to compound helmet curves without cracking or lifting at the edges.

Print Method

UV printed, ink cured instantly by ultraviolet light.

Gives you a scratch-resistant, waterproof surface that holds color through road exposure.

Color Output

CMYK full-color at 720 DPI minimum.

CMYK (cyan, magenta, yellow, black) reproduces accurate color across logos, gradients, and fine text.

Finishing

Die-cut to custom shape. Kiss-cut on backing sheet.

Kiss-cut means the backing stays intact, so peeling and applying stays clean and controlled.

Size Range

Custom sizes up to 58.5 in wide.

Most helmet spot graphics run between 2 in and 6 in, but larger panels are available.

Indoor/Outdoor Rating

Outdoor rated for roughly 3 to 5 years in direct sun, rain, and road conditions.

Indoor use typically extends lifespan beyond that range.

Single/Double-Sided

Single-sided only.

Printed face carries your design. Adhesive back bonds to the helmet shell.

Adhesive

Permanent, rated for outdoor use on polycarbonate, fiberglass, and ABS surfaces.

Bonds firmly but removes with low heat and slow peeling, leaving the shell scratch-free.
