

Product Specification Sheet

Custom Bat Knob Decals

Custom Bat Knob Decals ship on 4 mil white PVC calendar film with a matte finish and permanent adhesive. Each decal is die-cut to a circle sized for standard baseball and softball bat knobs, roughly 1 to 1.5 in in diameter. UV printing and a waterproof surface keep player names and numbers sharp through a full season of dugout handling and outdoor weather.

Material

4 mil white PVC calendar film, matte finish.

Thin, flexible vinyl that conforms to the small curved knob surface without lifting at the edges.

Print Method

UV printing, where ultraviolet light cures ink instantly on contact.

Produces a scratch-resistant, waterproof surface that holds up to repeated hand contact and rain.

Color Output

CMYK full-color at 720 DPI minimum.

CMYK (cyan, magenta, yellow, black) gives you accurate color on team logos, names, and numbers.

Finishing

Die-cut to shape, kiss-cut on backing sheet.

Die-cut means vinyl is cut to your exact shape. Kiss-cut leaves the backing intact for easy peeling.

Size Range

Custom sizes up to 58.5 in wide. Typical bat knob size is roughly 1 to 1.5 in in diameter.

Sized to fit standard bat knob surfaces on both baseball and softball bats.

Indoor/Outdoor Rating

Water and scratch resistant. Permanent adhesive holds through a full baseball or softball season.

Rated for outdoor use, typically 6 to 12 months of dugout handling and weather exposure.

Single/Double-Sided

Single-sided.

Printed face carries your design. Adhesive back bonds directly to the bat knob surface.

Adhesive

Permanent adhesive rated for indoor and outdoor surfaces.

Bonds firmly to curved plastic or metal knobs. Removes cleanly with slow peeling at end of season.
