## Custom Hard Hat Decals

Custom Hard Hat Decals run on 4 mil white PVC calendar film with a matte finish and permanent adhesive. Each decal is UV printed at 720 DPI minimum and die-cut to the exact shape of your design. They're built for construction and industrial hard hat shells, ordered per crew in quantities of 10 to 50 or more.

### Material

4 mil white PVC calendar film, matte finish.

A thin but sturdy vinyl that conforms to the slightly curved hard hat shell without cracking or lifting at edges.

### Print Method

UV printed.

Ink cures instantly under ultraviolet light, creating a scratch-resistant, water-resistant surface that holds up on active job sites.

### Color Output

CMYK full color at 720 DPI minimum.

CMYK (the 4-color process using cyan, magenta, yellow, and black) reproduces logos and certification marks with bold, accurate color.

### Finishing

Die-cut to custom shape. Kiss-cut on backing sheet.

Each decal peels cleanly from the intact paper backing without tearing, so crew distribution stays fast.

### Size Range

Custom sizes up to 58.5 in wide. Most hard hat decals run 2 to 4 in across.

Sizes beyond 58.5 in ship in multiple pieces for manual alignment on site.

### Indoor/Outdoor Rating

Water and scratch resistant. Holds up through direct sun, rain, and daily tool contact on active job sites.

Typical outdoor durability runs 6 to 12 months on a working hard hat shell.

### Single/Double-Sided

Single-sided. Printed face on front, permanent adhesive on back.

Designed to apply directly to the hard hat shell exterior only.

### Adhesive

Permanent. Bonds firmly to painted or plastic hard hat surfaces.

Can be removed with slow peeling and mild heat when a decal needs replacing.
