Product Specification Sheet

Custom Sports Vehicle Decals

Custom Sports Vehicle Decals run on 4mil white PVC calendar film with a matte finish and permanent adhesive. They bond to painted metal, glass, and plastic on any vehicle surface. Order them die-cut to any shape up to 58.5 in wide for cars, trucks, SUVs, vans, and team buses.

Material

4mil white PVC calendar film, matte finish.

A thin but sturdy vinyl that conforms to flat and slightly curved vehicle surfaces without bubbling or lifting at edges.

Print Method

UV printed.

Ink cures instantly under ultraviolet light, creating a scratch-resistant, waterproof surface that holds through rain and road spray.

Color Output

CMYK full color at 720 DPI minimum.

CMYK (the four-color process using cyan, magenta, yellow, and black) reproduces team colors and logo detail with crisp edges.

Finishing

Die-cut to custom shape, kiss-cut on backing sheet.

Die-cut follows your exact design outline. Kiss-cut keeps the backing paper intact so each decal peels cleanly without tearing.

Size Range

Custom sizes up to 58.5 in wide.

Sizes beyond 58.5 in ship in multiple pieces for manual alignment on bus sides or trailer panels.

Indoor/Outdoor Rating

3 to 5 years outdoor rated, water and scratch resistant.

Indoor use typically extends lifespan beyond 5 years.

Single/Double-Sided

Single-sided (adhesive back, printed face).

Designed to apply to an exterior vehicle surface with the graphic facing outward.

Adhesive

Permanent adhesive, removable with heat on factory paint finishes.

Bonds firmly to painted metal, glass, and plastic without leaving residue on properly cured factory paint.
