

Product Specification Sheet

Custom Bike Decals

Custom Bike Decals run on 4 mil white PVC calendar film with a matte finish, UV printed at 720 DPI minimum, and die-cut to any shape you need. They bond to painted metal, carbon fiber, aluminum, and plastic frame surfaces. Order one badge-sized piece or a matched set across an entire fleet.

Material

4 mil white PVC calendar film, matte finish.

A thin but sturdy vinyl that conforms to flat and slightly curved surfaces like frame tubes and fork legs.

Print Method

UV printed.

Ink cures instantly under ultraviolet light, giving you a scratch-resistant, waterproof surface that holds through road spray.

Color Output

Full-color CMYK at 720 DPI minimum.

CMYK (cyan, magenta, yellow, and black) gives you accurate color across logos, gradients, and photos.

Finishing

Die-cut to custom shape, kiss-cut on backing sheet.

We cut around your exact design outline. The backing sheet stays intact so each piece peels cleanly.

Size Range

Custom sizes up to 58.5 in wide.

Order anything from a small 2 in head tube badge to a full down tube graphic.

Indoor/Outdoor Rating

Outdoor rated 3 to 5 years. Water and scratch resistant.

Holds through rain, road grime, and direct sun without peeling or fading under normal riding conditions.

Single/Double-Sided

Single-sided. Adhesive back, printed face.

The printed surface faces out and bonds directly to the frame.

Adhesive

Permanent adhesive.

Bonds firmly to painted metal, carbon fiber, aluminum, and plastic. Removable with a heat gun and slow peeling without damaging factory paint.
