

Product Specification Sheet

Custom Camper Van Decals

Custom Camper Van Decals run on 4 mil white PVC calendar film with a matte finish and permanent adhesive. Every decal is UV printed at 720 DPI minimum and die-cut to your exact design shape. These specs make them the right call for van body panels, cargo doors, and side graphics up to 58.5 in wide.

Material

4 mil white PVC calendar film, matte finish, permanent adhesive.

PVC calendar film is a thin, flexible vinyl that conforms to flat and slightly curved van body panels without bubbling.

Print Method

UV printed, ink cured instantly by ultraviolet light on contact with the vinyl surface.

This creates a scratch-resistant, waterproof finish that won't smear or crack under road conditions.

Color Output

Full-color CMYK at 720 DPI minimum.

CMYK (cyan, magenta, yellow, black) reproduces any logo color or photographic image accurately.

Finishing

Die-cut to custom shape. Kiss-cut on backing sheet for clean, tear-free peeling.

Die-cut follows your design outline exactly, not a standard rectangle.

Size Range

Custom sizes up to 58.5 in wide. Orders over 58.5 in ship in multiple panels with alignment markings.

Most camper van side panels give you a usable flat run that fits within this single-piece maximum.

Indoor/Outdoor Rating

Outdoor rated 3 to 5 years. Water-resistant and scratch-resistant across most US climates.

Holds up through car washes, rain, road debris, and direct sun.

Single/Double-Sided

Single-sided only. Printed face carries the design. Adhesive back bonds to the van surface.

Not rated for see-through or double-faced applications.

Weight

4 mil thickness.

Thin enough to conform to body panel curves, thick enough to resist tearing during application and removal.
