

Product Specification Sheet

Custom Car Bumper Decals

Custom Car Bumper Decals are die-cut from 4 mil white PVC calendar film and UV printed in full CMYK color. They bond to painted bumpers, rear panels, and body surfaces with a permanent adhesive rated 3 to 5 years outdoors. Here's the thing: same tough material across every order, same sharp color output.

Material

4 mil white PVC calendar film, matte finish.

PVC calendar film is a thin, flexible vinyl sheet that conforms to flat and slightly curved surfaces without cracking.

Print Method

UV printed.

Ink cures instantly under ultraviolet light, producing a scratch-resistant, waterproof surface that survives car washes and road debris.

Color Output

CMYK full color at 720 DPI minimum.

CMYK uses cyan, magenta, yellow, and black to reproduce your full-color logo or graphic accurately.

Finishing

Die-cut to custom shape. Kiss-cut on backing sheet.

Kiss-cut (cutting through vinyl only, leaving the backing sheet intact) means the decal peels cleanly every time.

Size Range

Custom sizes up to 58.5 in wide.

Orders over 58.5 in ship in multiple pieces for manual alignment on the vehicle surface.

Indoor/Outdoor Rating

Outdoor rated 3 to 5 years. Water resistant, scratch resistant, and UV stable under direct sun.

Suitable for all standard outdoor vehicle conditions, including automatic car washes after the first 72 hours.

Single/Double-Sided

Single-sided.

The adhesive back bonds to the bumper. The printed face is the visible side.

Adhesive Type

Permanent adhesive.

Removable with a heat gun and slow peeling without damaging factory paint finishes.
