

Product Specification Sheet

Custom Car Windshield Decals

Custom Car Windshield Decals ship on 4 mil white PVC calendar film with a matte finish and permanent adhesive rated for outdoor glass surfaces. Full-color UV printing at 720 DPI minimum delivers crisp, scratch-resistant graphics that hold up 3 to 5 years outdoors. These decals suit car owners and fleet managers who need bold, durable graphics on the front windshield area.

Material

4 mil white PVC calendar film, matte finish.

PVC calendar film is a thin, flexible vinyl that conforms to flat and slightly curved glass surfaces without lifting.

Print Method

UV printed (ink cured instantly by ultraviolet light).

This creates a waterproof, scratch-resistant surface that does not smear or peel under normal outdoor conditions.

Color Output

Full-color CMYK at 720 DPI minimum.

CMYK uses cyan, magenta, yellow, and black to reproduce any color in your design with sharp, accurate results.

Finishing

Die-cut to custom shape. Kiss-cut on backing sheet.

Kiss-cut leaves the backing paper intact so you peel and apply without tearing the decal.

Size Range

Custom sizes up to 58.5 in wide.

Sizes beyond 58.5 in ship in multiple pieces with alignment guide markings for joining on the glass.

Indoor/Outdoor Rating

Outdoor rated 3 to 5 years.

Resists water, scratches, direct sun, and normal car wash use after the first 72-hour cure period.

Single/Double-Sided

Single-sided.

Adhesive bonds to the back of the vinyl. The printed face shows from outside the glass.

Adhesive Type

Permanent adhesive.

Bonds firmly to glass and painted metal. Removable with a heat gun and slow peeling without damaging factory glass or paint.
