

Product Specification Sheet

Custom Jeep Bumper Decals

Custom Jeep Bumper Decals run on 4 mil white PVC calendar film with a matte finish and permanent adhesive. UV printing at 720 DPI minimum locks color into a scratch-resistant, waterproof surface rated for 3 to 5 years outdoors. These decals fit Jeep front and rear bumpers in any custom size up to 58.5 in wide.

Material

4 mil white PVC calendar film, matte finish.

PVC calendar film is a thin, flexible vinyl that conforms to flat and slightly curved bumper surfaces without lifting at edges.

Print Method

UV printed.

UV printing cures ink instantly under ultraviolet light, giving you a waterproof, scratch-resistant surface through car washes and trail conditions.

Color Output

CMYK full color at 720 DPI minimum.

CMYK is the 4-color process using cyan, magenta, yellow, and black, giving you accurate color across logos and bold text.

Finishing

Die-cut to custom shape. Kiss-cut on backing sheet.

Kiss-cut (cut through vinyl only, backing stays intact) means the decal peels cleanly without tearing before application.

Size Range

Custom sizes up to 58.5 in wide.

Orders wider than 58.5 in ship in multiple pieces with alignment guides for seaming on the bumper surface.

Indoor/Outdoor Rating

Outdoor rated 3 to 5 years.

Water resistant, scratch resistant, and UV stable through rain, mud, and direct sun typical of Jeep use.

Single/Double-Sided

Single-sided.

The adhesive back bonds to the bumper surface. The printed face carries your design.

Adhesive Type

Permanent adhesive.

Bonds to painted metal, plastic, and powder-coated surfaces. Removable with a heat gun and slow peeling without damaging factory paint.
