

Product Specification Sheet

Custom Jeep Rear Window Decals

Custom Jeep Rear Window Decals run on 4 mil white PVC calendar film with a matte finish and permanent adhesive. UV-cured ink and a die-cut finish make these the right choice for Jeep owners who need a sharp, weather-resistant graphic that stays put through off-road conditions. Every spec below reflects what ships on your order.

Material

4 mil white PVC calendar film, matte finish.

PVC calendar film is a thin, flexible vinyl that conforms to flat and slightly curved glass without lifting at the edges.

Print Method

UV printed.

UV printing cures ink instantly under ultraviolet light, producing a waterproof, scratch-resistant surface that holds color through repeated washing.

Color Output

CMYK full color at 720 DPI minimum.

CMYK (cyan, magenta, yellow, and black) is the standard 4-color process. At 720 DPI, fine details and text stay crisp at rear-window viewing distances.

Finishing

Die-cut to custom shape. Kiss-cut on backing sheet.

Kiss-cutting leaves the backing sheet intact so the decal peels cleanly and applies without tearing.

Size Range

Custom sizes up to 58.5 in wide.

Orders wider than 58.5 in ship in multiple pieces with alignment guides for manual joining on the glass.

Indoor/Outdoor Rating

Outdoor rated 3 to 5 years. Water and scratch resistant.

Holds up through direct sun, trail mud, rain, and regular car washes after the first 72-hour cure period.

Single/Double-Sided

Single-sided.

The adhesive back bonds to the glass. The printed face shows through the rear window from outside the vehicle.

Adhesive Type

Permanent adhesive.

Bonds firmly to clean glass. Removable with a heat gun and slow peeling without leaving residue on factory glass surfaces.
