

Product Specification Sheet

Custom Jeep Window Decals

Custom Jeep Window Decals run on 4 mil white PVC calendar film with UV-cured ink at 720 DPI minimum. They're built for Jeep side glass, rear glass, and windshield areas where weather resistance and shape accuracy matter most. Here's what's in every order.

Material

4 mil white PVC calendar film, matte finish.

Calendar film is a thin, flexible vinyl that sits flat on glass without lifting at edges.

Print Method

UV printed.

Ink cures instantly under ultraviolet light, creating a waterproof, scratch-resistant surface without a separate laminate.

Color Output

CMYK full color at 720 DPI minimum.

CMYK (cyan, magenta, yellow, black) gives you accurate color across logos, photos, and text.

Finishing

Die-cut to custom shape. Kiss-cut on backing sheet.

Die-cutting follows your exact design outline so the decal peels cleanly in one piece.

Size Range

Custom sizes up to 58.5 in wide.

Sizes wider than 58.5 in ship in multiple pieces with alignment markings for joining on glass.

Indoor/Outdoor Rating

Outdoor rated 3 to 5 years. Water and scratch resistant.

Indoor use extends lifespan beyond 5 years under normal conditions.

Single/Double-Sided

Single-sided.

The adhesive back bonds to glass. The printed face is visible from outside the vehicle.

Adhesive Type

Permanent adhesive.

Bonds firmly to clean factory glass. Removable with a heat gun and slow peeling, no residue left behind.
