

Product Specification Sheet

Custom Motorcycle Fuel Tank Decals

Custom Motorcycle Fuel Tank Decals run on 4 mil white PVC calendar film with a matte finish. This material bends to follow slightly curved tank surfaces without cracking or lifting at the edges. It's the right call for any motorcycle panel where a rigid decal would fail.

Material

4 mil white PVC calendar film, matte finish.

PVC calendar film is a thin, flexible vinyl that conforms to curved tank surfaces without cracking.

Print Method

UV printed (ink cured instantly by ultraviolet light).

UV curing produces a scratch-resistant, waterproof surface that holds up to road grit and fuel splash.

Color Output

Full CMYK color at 720 DPI minimum.

CMYK (cyan, magenta, yellow, black) reproduces any color in your design with crisp, accurate results.

Finishing

Die-cut to custom shape. Kiss-cut on backing sheet.

Die-cut follows your exact design outline. Kiss-cut leaves the backing intact so the decal peels cleanly.

Size Range

Custom sizes up to 58.5 in wide.

Orders wider than 58.5 in ship in multiple pieces with alignment markings for manual joining.

Indoor/Outdoor Rating

Outdoor rated 3 to 5 years. Water resistant and UV stable under direct sun.

Holds up longer indoors away from road exposure and direct weather.

Single/Double-Sided

Single-sided only.

The printed face carries your design. The adhesive back bonds to the tank surface.

Adhesive Type

Permanent adhesive. Bonds to painted metal, plastic, and fiberglass.

Removable with a heat gun and slow peeling. Does not damage factory paint on clean removal.
