Product Specification Sheet

Custom Reflective Motorcycle Decals

Custom Reflective Motorcycle Decals run on 4 mil engineer-grade reflective vinyl with permanent adhesive and full-color UV printing. Every decal is die-cut to your exact design shape, so each one fits curved motorcycle panels without blank film showing around the edges. Best for riders who want bold graphics that stay visible to other drivers at night.

Material

4 mil engineer-grade reflective vinyl.

Engineer grade uses a micro-prismatic or glass-bead surface that bounces light back toward its source under headlights and flashlights.

Print Method

UV printing, where ink cures instantly under ultraviolet light at the print head.

The result is a scratch-resistant, waterproof surface without a separate lamination layer.

Color Output

Full-color CMYK.

CMYK is the 4-color process using cyan, magenta, yellow, and black to reproduce any logo, photo, or graphic.

Finishing

Die-cut to custom shape. Kiss-cut on backing sheet.

Kiss-cut keeps the backing intact so the decal peels cleanly without tearing.

Size Range

Custom sizes up to 58.5 in wide.

Orders wider than 58.5 in ship in multiple pieces with alignment guides for joining on the surface.

Indoor/Outdoor Rating

Outdoor rated 3 to 5 years.

Resists direct sun, rain, road debris, and typical motorcycle wash conditions. Indoor use lasts longer.

Single/Double-Sided

Single-sided.

The printed face carries the graphic and reflective effect. The adhesive back bonds to the surface.

Adhesive

Permanent.

Bonds to painted metal, plastic fairings, and helmet shells. Removable with a heat gun and slow peeling on factory finishes.
