

Product Specification Sheet

Custom Rv Decals

Custom RV Decals ship on 4 mil white PVC calendar film with a matte finish. UV printed at 720 DPI minimum, die-cut to fit RV side panels and rear surfaces up to 58.5 in wide. Single-sided, built for outdoor vehicle surfaces. Here's what's in every order.

Material

4 mil white PVC calendar film, matte finish.

PVC calendar film is a thin, flexible vinyl that conforms to flat and slightly curved RV panels without lifting at edges.

Print Method

UV printed.

UV printing cures ink under ultraviolet light instantly, producing a waterproof, scratch-resistant surface that holds through car washes and rain.

Color Output

CMYK full color at 720 DPI minimum.

CMYK (cyan, magenta, yellow, black) gives accurate color across logos, photos, and gradient graphics at this resolution.

Finishing

Die-cut to custom shape. Kiss-cut on backing sheet.

Kiss-cut (cut through vinyl only, backing sheet stays intact) means the decal peels cleanly without tearing before application.

Size Range

Custom sizes up to 58.5 in wide.

Designs wider than 58.5 in ship in multiple panels with alignment guide markings for seam matching on the RV surface.

Indoor/Outdoor Rating

Outdoor rated 3 to 5 years.

Holds through direct sun, rain, road debris, and highway wind. Indoor use extends life beyond 5 years.

Single/Double-Sided

Single-sided.

The adhesive back bonds to the RV surface. The printed face shows outward. Not rated for double-sided viewing.

Adhesive

Permanent.

Bonds firmly to painted metal, fiberglass, and plastic. Removable with a heat gun and slow peeling on factory finishes without pulling paint.
