Custom Trailer Decals

Custom Trailer Decals are die-cut vinyl graphics built for trailer side panels and rear doors. Every decal runs on 4 mil white PVC calendar film with UV-cured ink and permanent adhesive. Here's the thing: this combination gives you bold, lasting graphics that hold up to road conditions mile after mile without peeling or fading.

Material

4 mil white PVC calendar film, matte finish.

A thin but sturdy vinyl that conforms to flat and slightly curved trailer panels without cracking at the edges.

Print Method

UV printed, ink cured instantly by ultraviolet light during printing.

Produces a scratch-resistant, waterproof surface that holds up to road wash, fuel splatter, and direct sun.

Color Output

Full-color CMYK at 720 DPI minimum.

CMYK (cyan, magenta, yellow, and black) reproduces logos, photos, and gradients accurately across the full decal.

Finishing

Die-cut to custom shape. Kiss-cut (vinyl layer only cut, backing sheet left intact) on backing sheet.

Lets the decal peel cleanly and apply without tearing the design.

Size Range

Custom sizes up to 58.5 in wide without a seam.

Designs wider than 58.5 in ship in multiple panels with alignment markings for joining on the trailer surface.

Indoor/Outdoor Rating

Outdoor rated 3 to 5 years. Water resistant and scratch resistant.

Holds up to direct sun, rain, road debris, and car wash cycles after the first 72-hour cure period.

Single/Double-Sided

Single-sided. Printed face on front, permanent adhesive on back.

Not rated for see-through or double-sided viewing.

Adhesive

Permanent adhesive bonds to painted metal, plastic, and fiberglass trailer surfaces.

Removable with a heat gun and slow peeling. Does not damage factory paint finishes on removal.
