

Product Specification Sheet

Custom Truck Door Decals

Custom Truck Door Decals run on 4 mil white PVC calendar film with a matte finish and permanent adhesive. They're UV printed at 720 DPI minimum and die-cut to any shape up to 58.5 in wide. Use them on truck door panels, painted metal, glass, or plastic surfaces rated for 3 to 5 years outdoors.

Material

4 mil white PVC calendar film, matte finish.

Thin, flexible vinyl that conforms to flat and slightly curved truck door surfaces without lifting.

Print Method

UV printing, 720 DPI minimum.

Ink cures instantly under ultraviolet light, producing a waterproof, scratch-resistant face that survives car washes.

Color Output

Full-color CMYK at 720 DPI minimum.

CMYK (cyan, magenta, yellow, black) reproduces any logo or graphic accurately across the full decal face.

Finishing

Die-cut to custom shape. Kiss-cut on backing sheet.

The liner stays intact for easy peeling, so application does not require transfer tape on most designs.

Size Range

Custom sizes up to 58.5 in wide without a seam.

Designs wider than 58.5 in ship in multiple pieces with alignment guides for manual joining.

Indoor/Outdoor Rating

Rated 3 to 5 years outdoors in direct sun, rain, and road conditions.

Also suitable for flat indoor surfaces where longer life is typical.

Single/Double-Sided

Single-sided only.

The printed face shows outward on the door panel. The adhesive back bonds directly to the painted surface.

Adhesive Type

Permanent adhesive, removable with a heat gun and slow peeling.

Leaves no residue on factory paint finishes when removed correctly.
