

Product Specification Sheet

Custom Vinyl Bike Decals

Custom Vinyl Bike Decals run on 4 mil white PVC calendar film with permanent adhesive and UV-printed color at 720 DPI minimum. Each decal ships die-cut to your exact shape, kiss-cut on a backing sheet, ready to apply. They fit flat tube sections up to 58.5 in wide and hold up 3 to 5 years outdoors.

Material

4 mil white PVC calendar film, matte finish.

PVC calendar film is a thin, flexible vinyl that conforms to flat and slightly curved surfaces without lifting.

Print Method

UV printed. Ink cures instantly under ultraviolet light for a scratch-resistant, waterproof surface finish.

Color Output

CMYK full color at 720 DPI minimum.

CMYK uses cyan, magenta, yellow, and black to reproduce your artwork in accurate, crisp color.

Finishing

Die-cut to custom shape. Kiss-cut on backing sheet for clean, tear-free peeling during application.

Size Range

Custom sizes up to 58.5 in wide without a seam.

Orders wider than 58.5 in ship in multiple pieces with alignment guides.

Indoor/Outdoor Rating

Outdoor rated 3 to 5 years. Water and scratch resistant through direct sun, rain, and road grit.

Single/Double-Sided

Single-sided only. The adhesive back bonds to the frame. The printed face is the visible side.

Adhesive Type

Permanent adhesive. Bonds to painted metal, plastic, and carbon fiber. But it is removable with a heat gun and slow peeling on factory finishes without paint damage.
