

Product Specification Sheet

Custom Vehicle Window Decals

Custom Vehicle Window Decals run on 4 mil white PVC calendar film with a matte finish and permanent adhesive rated for glass surfaces. UV printing at 720 DPI minimum gives colors that stay sharp through rain, car washes, and direct sun. These decals work best for small business branding on door glass, rear window logos, and fleet identification.

Material

4 mil white PVC calendar film. Matte finish. PVC calendar film is a thin, flexible vinyl that conforms to flat and slightly curved glass without cracking or bubbling.

Print Method

UV printed. Ink cures instantly under ultraviolet light, giving you a waterproof, scratch-resistant surface that holds color outdoors.

Color Output

CMYK full color at 720 DPI minimum. CMYK (cyan, magenta, yellow, black) reproduces your full-color logo accurately on the matte vinyl surface.

Finishing

Die-cut to custom shape. Kiss-cut on backing sheet so the decal peels cleanly without tearing.

Size Range

Custom sizes up to 58.5 in wide. Sizes over 58.5 in ship in multiple pieces with alignment guides for joining on the glass.

Indoor/Outdoor Rating

Outdoor rated 3 to 5 years. Water resistant, scratch resistant, and UV stable under daily sun exposure on any vehicle.

Single/Double-Sided

Single-sided. Adhesive back bonds to glass. Printed face shows outward, readable from outside the vehicle.

Adhesive

Permanent adhesive. Bonds firmly to clean glass. Removable with a heat gun and slow peeling, leaving no residue on factory glass surfaces.
