Product Specification Sheet

Custom Windshield Decals

Custom Windshield Decals are die-cut from 4 mil white PVC calendar film and UV printed in full color at 720 DPI minimum. They fit any windshield up to 58.5 in wide and bond with permanent adhesive rated for outdoor use. Here's the thing: the matte finish and outdoor-rated adhesive together make these the right call for permit decals, fleet ID stickers, and small business branding on vehicle glass.

Material

4 mil white PVC calendar film, matte finish.

Thin but sturdy vinyl that conforms to flat glass and cuts glare so the printed face stays readable from outside.

Print Method

UV printed.

Ink cures instantly under ultraviolet light, creating a scratch-resistant, waterproof surface that holds through car washes.

Color Output

CMYK full color at 720 DPI minimum.

CMYK uses cyan, magenta, yellow, and black to give you accurate color across logos, text, and graphics.

Finishing

Die-cut to custom shape. Kiss-cut on backing sheet.

Die-cut follows your design's exact outline. Kiss-cut keeps the backing intact for fast, clean peeling.

Size Range

Custom sizes up to 58.5 in wide, any shape.

Orders over 58.5 in ship in multiple pieces with alignment guides included.

Indoor/Outdoor Rating

Outdoor rated 3 to 5 years.

Water resistant and scratch resistant after a 72-hour cure period on the glass surface.

Single/Double-Sided

Single-sided.

Adhesive bonds to the glass back. Printed face reads from outside the vehicle.

Adhesive

Permanent adhesive, removable with heat.

Bonds firmly to glass and painted metal. Slow peel after heat application leaves no damage on factory finishes.
