

Product Specification Sheet

Custom Clear Vinyl Decals

Custom Clear Vinyl Decals use an ultra-clear PVC vinyl substrate with a matching clear adhesive backing. Both layers are transparent, so unprinted areas disappear on glass, packaging, and smooth surfaces. These decals work best anywhere a white background would block or clash with the surface underneath.

Material

Ultra-clear PVC vinyl with clear adhesive backing.

Both the substrate and adhesive are transparent, keeping the surface fully visible through unprinted areas.

Print Method

UV printing (ink cured instantly by ultraviolet light).

UV curing bonds color directly to the vinyl for a scratch-resistant, waterproof finish on glass and outdoor surfaces.

Color Output

Full-color CMYK with no white ink layer.

Printed areas are opaque and bold. Unprinted areas remain fully transparent.

Finishing

Die-cut to custom shape. Kiss-cut on backing sheet.

The liner stays intact so the decal peels cleanly without tearing.

Size Range

Custom sizes up to 58.5 in wide in any dimension.

Orders wider than 58.5 in ship in multiple pieces with alignment overlap instructions.

Indoor/Outdoor Rating

Rated for indoor and outdoor use. Typically holds 3 to 5 years outdoors in direct sun on glass and smooth surfaces.

Indoor applications last longer.

Single/Double-Sided

Single-sided only.

The printed face is visible from the front. The adhesive back bonds to the surface.

Adhesive

Permanent clear adhesive bonds firmly to glass, plastic, metal, and smooth painted surfaces.

Removable with a heat gun and slow peeling without leaving residue on most surfaces.
