## Custom Vinyl Door Decals

Custom Vinyl Door Decals run on 4mil white PVC calendar film, UV printed at 720 DPI minimum, and die-cut to fit commercial glass and solid door panels. They carry business names, suite numbers, hours, logos, and compliance information with a crisp, scratch-resistant finish. Permanent adhesive holds the decal flat through years of daily door contact.

### Material

4mil white PVC calendar film, matte finish.

A thin but sturdy vinyl that conforms to flat commercial glass and solid door panels without bubbling or lifting at edges.

### Print Method

UV printed.

Ink cures instantly under ultraviolet light, creating a scratch-resistant, waterproof surface that handles daily contact on a busy door.

### Color Output

CMYK full color at 720 DPI minimum.

Four-color printing at 720 DPI gives text and logos a crisp, readable finish at typical door-reading distance of 3 to 10 ft.

### Finishing

Die-cut to custom shape, kiss-cut on backing sheet.

The machine cuts around your exact design outline. The backing sheet stays intact for clean peeling and accurate placement.

### Size Range

Custom sizes up to 58.5 in wide.

Orders wider than 58.5 in ship in multiple pieces with alignment overlap for manual joining on the door surface.

### Indoor/Outdoor Rating

3 to 5 years outdoor rated.

Holds up on exterior-facing glass doors in direct sun and rain. Indoor placement typically extends life beyond 5 years.

### Single/Double-Sided

Single-sided. Adhesive back, printed face.

Designed for one-surface application on a door panel, not for double-sided window viewing.

### Adhesive

Permanent.

Bonds firmly to commercial glass, painted metal, and solid door surfaces. Removable with a heat gun and slow peeling without leaving residue on factory-finished glass.
