

Product Specification Sheet

Custom Clear Window Decals

Custom Clear Window Decals run on ultra clear vinyl with a clear adhesive backing. Every unprinted area stays fully transparent, so the glass behind the graphic stays visible. These decals work on smooth indoor and outdoor glass surfaces, from storefront windows to glass office partitions.

Material

Ultra clear vinyl with clear adhesive backing.

The substrate is fully transparent, so glass shows through every area carrying no ink.

Print Method

CMYK (a four-color process using cyan, magenta, yellow, and black) printed directly onto clear vinyl.

Ink bonds to the vinyl surface for sharp, full-color output.

Color Output

Full-color CMYK with no white ink.

Unprinted areas stay transparent because there is no opaque base layer behind the colors.

Finishing

Die-cut to the exact outline of your design. Kiss-cut on the backing sheet (cut through the vinyl only, liner stays intact) for a clean, controlled peel.

Size Range

Custom sizes up to 58.5 in wide.

Orders wider than 58.5 in ship in multiple panels with alignment guides for joining on the glass.

Indoor/Outdoor Rating

Rated for both indoor and outdoor glass surfaces.

Outdoor durability runs roughly 6 to 12 months in direct sun. Indoor applications typically last longer.

Single/Double-Sided

Single-sided.

The printed face is visible from outside the glass. The adhesive back bonds to the glass surface.

Weight

Not specified by the manufacturer for this clear vinyl substrate.

Weight is not a relevant spec for flat window decal applications.
