

Product Specification Sheet

Custom Frosted Window Decals

Custom Frosted Window Decals run on 4 mil printed vinyl with thick clear lamination that creates a matte, translucent surface mimicking sandblasted glass. They bond to indoor and outdoor glass surfaces and let diffused light through while blocking direct visibility. Order them anywhere you need privacy without darkening the space.

Material

4 mil printed vinyl with thick clear lamination creating a frosted, matte surface effect.

Rated for glass and window applications on both indoor and outdoor surfaces.

Print Method

CMYK (a 4-color process using cyan, magenta, yellow, and black ink). No white ink is used on this material.

Color Output

Full-color CMYK within printed areas. Logos and text print bold against the frosted background.

Finishing

Die-cut to custom shape or kiss-cut on backing sheet. Kiss-cut leaves the liner intact for clean, easy peeling.

Size Range

Custom sizes up to 58.5 in wide per panel. Orders wider than 58.5 in ship in multiple panels with alignment guides.

Indoor/Outdoor Rating

Rated for both indoor and outdoor glass. Indoor installs typically last several years. Outdoor longevity varies by sun exposure and weather conditions.

Single/Double-Sided

Single-sided. Adhesive bonds to the glass surface. The printed frosted face is the visible side.

Weight

4 mil total vinyl thickness before lamination. Thin enough to conform to flat glass without edge lifting under normal conditions.
