

Product Specification Sheet

Custom Perforated Window Decals

Custom Perforated Window Decals are 6.5 mil perforated vinyl graphics printed single-sided with UV-cured CMYK ink. The 70/30 perforation structure makes the graphic look solid from outside while keeping interior visibility intact. They work on storefront glass, vehicle rear windows, and office partitions facing hallways or atriums.

Material

6.5 mil perforated vinyl with black adhesive backing.

The black backing blocks rear light so the outside graphic reads as solid, not washed-out.

Print Method

UV printing (ink cured instantly by ultraviolet light) for a scratch-resistant, waterproof finish.

UV bonding holds up on glass exposed to weather, rain, and direct sun.

Color Output

Full-color CMYK at 720 DPI minimum.

CMYK is the four-color process using cyan, magenta, yellow, and black to reproduce any color in your artwork.

Finishing

Die-cut to any custom shape or standard rectangle. Kiss-cut on backing sheet.

The kiss-cut keeps edges intact so the decal peels cleanly without tearing on site.

Size Range

Custom sizes up to 58.5 in wide.

Orders wider than 58.5 in ship as multiple panels with alignment guides for on-site installation.

Indoor/Outdoor Rating

Rated for both indoor and outdoor glass surfaces.

Outdoor durability varies by sun exposure. Direct sun on south-facing glass is the hardest condition.

Single/Double-Sided

Single-sided printing only.

The perforated structure and black backing are designed for one-way visibility. Double-sided printing is not possible on this material.

Perforation Ratio

70/30 (70% print area, 30% open holes).

This blocks roughly 50% of incoming light while keeping the outside graphic looking full-color and solid.
