

Product Specification Sheet

Custom Shark Fin Flags

Custom Shark Fin Flags print on 110 GSM knitted polyester using dye sublimation for bold, fade-resistant color across the full angular silhouette. They stand 6 to 18 ft tall and mount on a steel ground spike or steel cross base. Suited for car lots, retail storefronts, and outdoor events on any surface.

Material

110 GSM knitted polyester fabric.

Breathable weave lets wind pass through, reducing pole stress during moderate gusts.

Print Method

Dye sublimation full-color printing.

Ink bonds into the fibers so color will not crack, peel, or wash out at the edges.

Color Output

CMYK full color.

CMYK (cyan, magenta, yellow, and black) reproduces logos, gradients, and photos across the full visible color range.

Finishing

Flag sleeve along the pole edge.

Pole sections thread through the sleeve so the flag stays attached without clips or ties.

Size Range

6 to 18 ft total height, flag and pole combined.

Width varies with the shark fin silhouette at each height.

Indoor/Outdoor Rating

Rated for both indoor and outdoor use.

Outdoor rating is 3 to 6 months with daily sun, wind, and light rain before fading and edge fraying become visible.

Single/Double-Sided

Single-sided is standard, with mirror-image show-through at roughly 80 percent visibility on the reverse.

Double-sided uses two independent prints with a blockout layer (a solid white interlayer) between them.

Weight

110 GSM.

GSM (grams per square meter) measures fabric weight. At 110 GSM this fabric is light enough to flutter in a moderate breeze while holding printed color without distortion.
