

Product Specification Sheet

Custom Rectangle Clip Flags

Custom Rectangle Clip Flags run on 4 oz polyester mesh fabric with dye sublimation printing and a clamp base that attaches to tables, tent poles, railings, and fences. They suit both indoor and outdoor event use. Here's the thing: the open-weave mesh is what makes the clamp hold reliably outdoors, because wind passes through the flag face instead of pulling against the mount.

Material

4 oz polyester mesh fabric.

The open-weave construction lets air pass through, reducing wind stress on the clamp and keeping the flag from pulling loose.

Print Method

Dye sublimation.

Ink bonds directly into the polyester fibers, so the print does not crack, peel, or lift off the fabric surface.

Color Output

Full CMYK color across the entire flag face.

CMYK (cyan, magenta, yellow, and black) accurately reproduces logos, gradients, and photographic images.

Finishing

Hemmed edges on all sides. Fitted pole sleeve. Clamp base and pole hardware ship ready to attach.

Size Range

Flag height runs 6 to 18 ft depending on the pole configuration selected at checkout.

Flag width varies with the rectangle shape and the pole height chosen.

Indoor/Outdoor Rating

Suitable for both indoor and outdoor use.

Outdoor lifespan runs roughly 6 to 12 months with regular event use. Indoor flags last longer.

Single/Double-Sided

Single-sided prints one face and shows through as a mirror image on the back.

Double-sided uses two printed layers with a blockout layer (an opaque middle layer that stops color show-through) between them so both sides read correctly.

Weight

4 oz flag fabric.

Lightweight mesh keeps the full flag and pole kit easy to carry and reduces load on the clamp during outdoor use.
