

Product Specification Sheet

Custom Acrylic Business Signs

Custom Acrylic Business Signs are 1/4 in clear plexiglass panels printed with CMYK direct print and a full white backing layer. These signs suit corporate lobbies, reception areas, and suite identification in law firms, medical offices, and consulting practices where the sign stays on the wall for years.

Material

1/4 in clear plexiglass (acrylic sheet).

Thick enough to feel sturdy in hand and cast a visible shadow when standoff-mounted.

Print Method

CMYK direct print plus full white backing, UV-cured on the acrylic surface.

The white backing makes colors read bold against the transparent panel.

Color Output

Full color.

CMYK reproduces logos, gradients, and photography with sharp detail at these panel sizes.

Finishing

Pre-drilled corner holes for standoff mounts. Edges are smooth and polished.

Standoff mounts (small metal spacers) create a floating effect roughly 0.5 to 1 in off the wall.

Size Range

16x24, 20x30, and 24x36 in.

These three sizes cover most lobby, reception, and suite identification applications.

Indoor/Outdoor Rating

Indoor use. Holds up 5 to 10 years indoors without yellowing.

Prolonged outdoor UV exposure causes yellowing over roughly 2 to 3 years.

Single/Double-Sided

Single-sided.

CMYK print and white backing run on one face. The reverse side stays clear.

Weight

Not specified in current product data.

Plan for wall anchors rated for the panel weight, especially at 24x36 in.
