

Product Specification Sheet

Custom Hotel Signs

Custom Hotel Signs are rigid 3/16 in white foam core panels printed with full-color CMYK UV ink. Each panel uses a polystyrene core with smooth bright white faces. They cover every indoor hospitality signage need, from room numbers to lobby identification to conference center wayfinding.

Material

3/16 in white foam core. Polystyrene core with bright white smooth faces, rigid enough to mount flat or sit in a standard frame without bowing.

Print Method

Direct UV print. Ink applies directly to the foam core surface and cures instantly, giving a scratch-resistant finish that does not peel or bubble.

Color Output

CMYK full color. Cyan, magenta, yellow, and black combine to reproduce your brand colors accurately across every panel in the order.

Finishing

Cut to size with clean straight edges. Panels sit flush in standard frames or mount flat with adhesive strips.

Size Range

Standard sizes include 16x24 in, 20x30 in, and 24x36 in. Custom dimensions are available for non-standard frame openings or door-mounted room number signs.

Indoor/Outdoor Rating

Rated for indoor use only. Direct sun or moisture degrades the paper faces over time.

Single/Double-Sided

Single-sided or double-sided printing available. Double-sided suits freestanding directory frames visible from both sides.

Weight

Very lightweight. A 24x36 in panel weighs roughly a few ounces, making adhesive-strip mounting safe for lobby frames and wall displays.
