Product Specification Sheet

Custom Lobby Signs

Custom Lobby Signs run on 3/16 in white foam core, a rigid indoor panel with a polystyrene core and smooth bright white faces on both sides. Direct UV CMYK print bonds color directly to the white surface, giving you accurate logo reproduction without a laminate layer. These panels are built for indoor reception and lobby display, frames, and presentation boards.

Material

3/16 in white foam core. Polystyrene core with smooth bright white paper faces. Rigid enough to mount flat without a backing board.

Print Method

Direct UV print. Ink cures instantly on the surface, producing a scratch-resistant finish that holds indoors for years.

Color Output

CMYK full color. Cyan, magenta, yellow, and black inks reproduce logos, photography, and brand colors accurately across the full panel.

Finishing

No standard finishing applied. Panels ship flat, ready to frame, mount with adhesive strips, or display on an easel.

Size Range

Custom sizes available. Common lobby display sizes run from 16 x 20 in up to 24 x 36 in. Larger sizes available on request.

Indoor/Outdoor Rating

Indoor use only. Kept away from direct moisture, the printed surface holds color for years without fading.

Single/Double-Sided

Single-sided printing standard. Double-sided available for panels displayed in open frames or freestanding holders.

Weight

Roughly 1 lb at 24 x 36 in. Light enough to mount with adhesive strips on smooth drywall without drilling.
