

Product Specification Sheet

Custom Monument Signs

Custom Monument Signs ship as rigid, direct-printed panels ready to mount to a prepared monument base. Each panel runs full CMYK UV print on a lightweight, sturdy substrate sized to fit your base face opening. Rated for permanent outdoor use.

Material

Lightweight rigid panel. Mounts to concrete, stone, brick, or composite base structures sourced and installed locally by your contractor.

Print Method

Direct UV print. Ink cures instantly on the panel surface, giving you a scratch-resistant, waterproof finish that doesn't lift or crack outdoors.

Color Output

Full CMYK (cyan, magenta, yellow, black). Reproduces logos, gradients, and photography accurately across the entire panel face.

Finishing

Pre-drilled holes sized for standard anchor bolts. Your installer attaches the panel to the base without additional on-site drilling.

Size Range

Custom sizing available. Standard panels run roughly 24 in x 18 in up to 4 ft x 8 ft, matching your base face dimensions and local zoning height limits.

Indoor/Outdoor Rating

Permanent outdoor use. UV-printed panels typically hold color and structural integrity for 5 or more years in direct sun and weather exposure.

Single/Double-Sided

Single-sided panels are standard. Double-sided panels are available for freestanding structures readable from both entry and exit lanes.

Weight

Lightweight and rigid. Two-person installation onto a prepared base, no heavy lifting equipment needed.
