

Product Specification Sheet

Custom Storefront Signs

Custom Storefront Signs ship on .040 aluminum, UV printed and ready for exterior wall or post mounting. They're built for businesses that need a name, logo, and hours readable from the street every day for 5 or more years without maintenance.

Material

.040 aluminum (rust-proof, rigid metal, roughly 1mm thick).

Industry-standard gauge for commercial exterior signs. Holds mounting hardware without warping over time.

Print Method

Direct UV print (ink applied straight to the aluminum surface, cured instantly by ultraviolet light).

Gives a scratch-resistant finish that doesn't crack or peel.

Color Output

CMYK full color.

Reproduces logo colors and text accurately so the proof matches what goes on the wall.

Finishing

Pre-drilled holes for screw mounting, standard. Post mount and hanging hardware available.

Choose your mounting option at checkout based on your building surface.

Size Range

Standard sizes 12x18, 18x24, and 24x36 inches. Custom dimensions available.

Enter exact facade measurements at checkout for a precise fit.

Indoor/Outdoor Rating

Rated for outdoor use. Typically holds up 5 or more years in direct sun and weather.

No rusting, fading, or structural warping under normal exterior conditions.

Single/Double-Sided

Single-sided standard for wall-mounted applications. Double-sided available.

Order double-sided for signs mounted perpendicular to the building where both faces are visible.

Weight

Lightweight relative to rigidity at .040 thickness.

A two-person crew can handle installation without heavy lifting equipment.
