

Product Specification Sheet

Custom Magnetic Car Door Signs

Custom Magnetic Car Door Signs run on a 30 mil flexible magnetic sheet printed with full-color UV ink. They're sized for sedan, SUV, and crossover door panels and stick to steel body panels without adhesive. No residue, no tools, and no installation.

Material

30 mil flexible magnetic sheet (removable, no adhesive).

Grips steel doors, trunks, and hoods. Does not work on aluminum, fiberglass, or plastic panels.

Print Method

Direct UV print, ink bonded to the magnetic surface and cured instantly under UV light.

Gives a scratch-resistant, waterproof finish that holds up through repeated removal and reapplication.

Color Output

CMYK full-color (the 4-color process using cyan, magenta, yellow, and black).

Reproduces logos, photos, and text in bold, accurate color across the full sign face.

Finishing

Straight or rounded corners available.

Rounded corners prevent edge lifting at highway speeds and are the better choice for vehicle use.

Size Range

Custom sizes available. Typical car door sizes run 12x18 in for compact sedans up to 18x24 in for SUV and crossover panels.

Order the size that fits your specific door panel.

Indoor/Outdoor Rating

Rated for outdoor use. UV-printed surface resists rain and sun, holding up 2 to 3 years with weekly removal and cleaning.

Single/Double-Sided

Single-sided only. Order 2 signs, one per door, for both driver and passenger side coverage.

Thickness

30 mil (roughly 0.75 mm). Thick enough to maintain flat contact and resist wind lift at speeds up to roughly 65 mph on a clean, dry surface.
