

Product Specification Sheet

Custom Magnetic Car Signs

Custom Magnetic Car Signs run on a 30 mil flexible magnetic sheet printed with full-color UV ink. Each sign sticks to steel body panels without adhesive and peels off in seconds. These are built for sedan, SUV, and crossover door panels where flat steel surface area gives the magnet a solid grip.

Material

30 mil flexible magnetic sheet, removable, no adhesive.

Roughly 0.75 mm thick. Sticks to steel panels and leaves zero residue when removed and cleaned weekly.

Print Method

Direct UV print, ink cured by ultraviolet light directly onto the magnetic face.

Bonds color into the sheet surface for a scratch-resistant, weather-resistant finish that does not peel or bubble.

Color Output

CMYK full-color (cyan, magenta, yellow, and black combined to reproduce any logo color or photo).

Bold, crisp color reads clearly from across a street or parking lot.

Finishing

Straight or rounded corners available.

Rounded corners prevent edge lifting at highway speeds and are the recommended choice for car door use.

Size Range

12x18 in, 12x24 in, and 18x24 in standard. Custom sizes available.

Sized to fit sedan, SUV, and crossover door panels without overlapping handles or body creases.

Indoor/Outdoor Rating

Rated for outdoor vehicle use. UV-printed face holds up 2 to 3 years with weekly removal and cleaning.

Continuous outdoor exposure without maintenance shortens that lifespan noticeably.

Single/Double-Sided

Single-sided print on a white magnetic face.

The raw magnetic surface contacts the vehicle panel. The printed face faces outward.

Weight

A 12x18 in sheet runs roughly 0.5 lb. An 18x24 in sheet runs roughly 1 lb.

Both sizes stay flat against the door panel at normal driving speeds.
