

Product Specification Sheet

Custom Magnetic Truck Door Signs

Custom Magnetic Truck Door Signs run on 30 mil flexible magnetic sheet printed with direct UV ink. Sized for pickup and commercial truck door panels, they grip steel surfaces without adhesive and peel off in seconds. Here's what you get with every order.

Material

30 mil flexible magnetic sheet (removable, no adhesive, no residue).

Works on steel truck door panels only. Test your door with a refrigerator magnet before ordering.

Print Method

Direct UV print bonds ink to the magnetic surface and cures it instantly under UV light.

Produces a scratch-resistant, waterproof graphic that does not peel or bubble.

Color Output

CMYK full-color output (the 4-color printing process using cyan, magenta, yellow, and black).

Reproduces logos, phone numbers, and brand colors accurately across the full sign face.

Finishing

Straight or rounded corners available.

Rounded corners resist edge lifting at highway speed. Rounded is the better choice for road use.

Size Range

Custom sizes fit pickup and commercial truck door panels, with options up to 24x36 in.

Measure your door panel from handle to edge before uploading your design file.

Indoor/Outdoor Rating

Rated for outdoor use 2 to 3 years with proper weekly removal and cleaning.

UV-printed surface resists rain and road spray. Prolonged sun exposure gradually fades color over time.

Single/Double-Sided

Single-sided print only.

The magnetic backing faces the truck door. Your full-color design prints on the face.

Thickness

30 mil (roughly 0.75 mm). Heavier than thin promotional magnets.

That extra thickness gives the sheet enough grip strength to stay flat at highway speed.
