

Product Specification Sheet

Custom Magnetic Van Signs

Custom Magnetic Van Signs run on a 30 mil flexible magnetic sheet printed with direct UV ink in full CMYK color. This is the thickest standard magnetic sheet we offer, built specifically for the large, flat side panels on service vans. It grips steel surfaces without adhesive and peels off cleanly every time.

Material

30 mil flexible magnetic sheet, removable, no adhesive, no residue.

Thicker than standard refrigerator magnets (roughly 10 to 15 mil), so it holds flat at highway speed.

Print Method

Direct UV print, ink cured instantly by ultraviolet light onto the magnetic surface.

Produces a scratch-resistant finish that does not peel, bubble, or lift under road spray.

Color Output

CMYK full-color (cyan, magenta, yellow, black combined to reproduce any logo color or photo).

No color limits on artwork.

Finishing

Straight or rounded corners available.

Rounded corners reduce edge lifting at highway speed and are the better choice for van side panel use.

Size Range

Custom sizes cut to your exact dimensions. Full van side panel magnets run up to 2x4 ft.

Door-only sizes start around 12x18 in.

Indoor/Outdoor Rating

Outdoor rated for 2 to 3 years with proper weekly care.

Remove and dry both surfaces after heavy rain to prevent moisture trapping between the sign and panel.

Single/Double-Sided

Single-sided print only. The magnetic backing faces the van panel and the printed face carries your full-color artwork.

Weight

A 2x4 ft sign runs roughly 2 to 3 lbs. Light enough to apply and remove by hand without a second person.
