

Product Specification Sheet

Custom Magnetic Vehicle Door Signs

Custom Magnetic Vehicle Door Signs run on a 30 mil flexible magnetic sheet printed with full-color UV ink. Each sign is sized for vehicle door panels specifically, keeping the layout clear of handles, mirrors, and body creases. These are the right choice for steel door panels on cars, trucks, and vans.

Material

30 mil flexible magnetic sheet. Removable, no adhesive, no residue. Grips steel door panels only. Does not hold on aluminum, fiberglass, or plastic.

Print Method

Direct UV print. Ink bonds to the magnetic surface and cures instantly, giving you a scratch-resistant, water-resistant finish.

Color Output

CMYK full-color (cyan, magenta, yellow, and black). Reproduces logos, photos, and text in sharp, accurate color across the full sign face.

Finishing

Straight or rounded corners available. Rounded corners reduce wind catch at highway speed and prevent edge lifting on door panels.

Size Range

Custom sizes available. Standard door sign sizes run roughly 12x18 in, 12x24 in, and 18x24 in. Avoid sizing that overlaps door handles or body creases.

Indoor/Outdoor Rating

Rated for outdoor use. With weekly removal and cleaning, the printed graphic holds up roughly 2 to 3 years. Indoor storage when not in use extends lifespan.

Single/Double-Sided

Single-sided print only. The magnetic backing faces the door surface. The printed face is the visible side.

Thickness

30 mil (roughly 0.03 in). Standard thickness for vehicle door magnets. Thinner magnets lose grip at speed.
