

Product Specification Sheet

Custom Metal Door Signs

Custom Metal Door Signs are .040 aluminum panels UV-printed in full color for permanent door-mounted identification. Each sign is rust-proof indoors and outdoors, built to stay readable for 5 or more years without replacement. Three sizes cover most standard door frames and corridor mounting positions.

Material

.040 aluminum, roughly 1 mm thick, rust-proof in rain, humidity, and coastal salt air.

No protective coating needed. The aluminum itself does not corrode.

Print Method

Direct UV print bonds ink to the aluminum surface and cures it instantly with UV light.

The result is a scratch-resistant, waterproof finish that holds up through daily cleaning.

Color Output

Full-color CMYK output reproduces logos, photos, and text in any color combination.

White aluminum base gives the most vibrant color reproduction of any metal substrate.

Finishing

Straight or rounded corners available on every order.

Rounded corners reduce sharp edges where people brush past at close range.

Size Range

12x18 in, 18x24 in, and 36x24 in.

The 12x18 in fits most door-frame mounting positions without overhanging the frame edge.

Indoor/Outdoor Rating

Rated for long-lasting indoor or outdoor use. UV-printed graphics resist fading for 5 or more years in direct sun.

Aluminum does not rust, warp, or crack regardless of weather exposure.

Single/Double-Sided

Single-sided or double-sided printing available.

Double-sided suits corridor doors where the sign needs to read from both the approach and exit sides.

Weight

A 12x18 in sign weighs roughly 8 oz.

Light enough to mount with two screws into a door frame without reinforcement.
