

Product Specification Sheet

Custom No Parking Signs

Custom No Parking Signs ship on .040 aluminum, a rigid metal sheet roughly 1 mm thick that resists rust, impact, and warping outdoors. Direct UV print bonds ink directly to the metal surface for a scratch-resistant, waterproof finish that holds color through freeze-thaw cycles and direct sun. These signs suit private parking lots, fire lanes, driveways, and any property entrance where a prohibition message needs to stay readable for 5 or more years.

Material

.040 aluminum (rigid, rust-proof metal sheet, roughly 1 mm thick).

Holds its shape on a post or wall through freeze-thaw cycles without warping or corroding.

Print Method

Direct UV print, ink cured instantly by UV light.

Gives a scratch-resistant, waterproof finish that bonds tight to the aluminum surface.

Color Output

Full-color CMYK. Red and white per MUTCD (Manual on Uniform Traffic Control Devices) convention, or custom colors.

Crisp, bold output stays true to your approved proof without fading.

Finishing

Straight or rounded corners available. Both use the same .040 aluminum base.

Rounded corners reduce sharp edges on signs mounted at pedestrian height.

Size Range

12x18 in, 18x24 in, and 36x24 in.

Covers single-space posts up to wide fire lane and loading zone coverage.

Indoor/Outdoor Rating

Rated for outdoor use 5 or more years. Aluminum does not rust.

UV-printed ink resists fading in direct sun for the full outdoor lifespan.

Single/Double-Sided

Single-sided or double-sided printing available.

Double-sided signs read from both directions on a post mount at a drive aisle entrance.

Weight

A 18x24 in sign weighs roughly 1 to 2 lbs.

Straightforward to post-mount or wall-mount without heavy hardware.
