

Product Specification Sheet

Custom No Trespassing Signs

Custom No Trespassing Signs print on .040 aluminum, a rigid, rust-proof metal sheet about 1mm thick. This is the same material used for commercial road and regulatory signs. It holds its shape on a post, fence, or wall and stays readable outdoors for 5 or more years.

Material

.040 aluminum, rust-proof and rigid.

Holds its shape on a post or fence without warping through heat, cold, or moisture.

Print Method

Direct UV print (ink cured instantly by ultraviolet light on the aluminum surface).

Produces a scratch-resistant, waterproof finish that does not peel or bubble.

Color Output

Full color across the entire sign face.

Bold reds, blacks, and whites reproduce with sharp, high-contrast text readable at a distance.

Finishing

Straight or rounded corners available.

Rounded corners reduce sharp edges on fence-mounted or post-mounted signs where contact is likely.

Size Range

12x18 in, 18x24 in, and 36x24 in.

The 12x18 in fits most U-channel post hardware. The 36x24 in suits high-visibility gate or fence mounting.

Indoor/Outdoor Rating

Rated for permanent outdoor use. Typically holds up 5 or more years in direct sun, rain, and freeze-thaw conditions.

Aluminum does not rust, so no protective coating or seasonal treatment is needed.

Single/Double-Sided

Available single sided or double sided.

Double-sided printing suits entry points where traffic approaches from both directions.

Corner Style

Straight or rounded corners.

Rounded corners are the standard choice for post and chain-link fence mounting.
