

Product Specification Sheet

Custom Private Property Signs

Custom Private Property Signs run on .040 aluminum, a rust-proof rigid metal sheet about 1mm thick. This is the same material standard used for commercial road signage across the country. Three sizes and two corner styles cover most private road, fence, and gate mounting situations.

Material

.040 aluminum (rigid, rust-proof metal sheet, roughly 1mm thick).

Won't rust on post mounts, wall mounts, or fence mounts through years of outdoor exposure.

Print Method

Direct UV print (ink applied and cured instantly by ultraviolet light directly onto the aluminum surface).

Produces a scratch-resistant, waterproof finish that doesn't peel, bubble, or fade.

Color Output

Full color across the entire sign face.

Text, logos, symbols, and background colors all print in one pass at the same crisp resolution.

Finishing

Straight or rounded corners available.

Rounded corners reduce sharp edges on signs at pedestrian height or near vehicle traffic lanes.

Size Range

12x18 inches, 18x24 inches, and 36x24 inches.

Covers single gate posts up to wide fence spans and high-visibility entrances.

Indoor/Outdoor Rating

Rated for indoor or outdoor use. Outdoor lifespan is typically 5 or more years in direct sun and weather.

Indoor signs last indefinitely under normal conditions.

Single/Double-Sided

Single-sided for wall or fence mounts facing one direction. Double-sided for post-mounted signs at entrances where traffic approaches from both directions.

Double-sided eliminates the need for two separate signs at the same post.

Weight

A 18x24 inch sign weighs roughly 1 to 2 lbs.

Lightweight enough for single-person installation on most post or wall hardware.
