

Product Specification Sheet

Custom Safety Signs

Custom Safety Signs are full-color aluminum signs built for indoor and outdoor workplace and property safety messaging. Each sign runs on .040 aluminum with direct UV print, covering OSHA-convention green and white layouts across three standard sizes. These are built to mount and stay readable for 5 or more years without surface degradation.

Material

.040 aluminum (roughly 1mm thick rigid metal sheet, the industry-standard gauge for commercial signs).

Does not rust, does not warp, and holds mounting hardware without cracking over years of outdoor exposure.

Print Method

Direct UV print (ink applied directly to the aluminum surface and cured instantly by UV light).

Produces a scratch-resistant, waterproof finish with no laminate layer needed.

Color Output

Full color across the entire sign face. OSHA-convention green and white layouts available as standard templates. Custom color combinations also available.

Finishing

Straight or rounded corners available.

Rounded corners reduce sharp edges on signs mounted at shoulder or head height in high-traffic areas.

Size Range

12x18 in, 18x24 in, and 36x24 in.

The 36x24 in covers wide bay walls and loading dock zones readable from 20 or more feet away.

Indoor/Outdoor Rating

Rated for indoor and outdoor use. Direct UV print holds up in direct sun and rain for 5 or more years without fading or rusting.

Single/Double-Sided

Single-sided for wall, fence, and post mounts. Double-sided for aisle or overhead mounts where the sign needs to read from both directions.

Weight

A 12x18 in sign weighs roughly 0.5 lb. A 36x24 in sign weighs roughly 1.5 lb, easy to mount with standard screws or standoffs.
