

Product Specification Sheet

Custom Business Yard Signs

Custom Business Yard Signs run on 4mm corrugated plastic, a rigid, waterproof fluted sheet that holds its shape staked into soil without buckling. Every sign uses direct UV printing for a crisp, weather-resistant finish suited to short-term outdoor business use across 3 to 6 months.

Material

4mm corrugated plastic (rigid, waterproof, lightweight fluted sheet).

Holds its shape staked into soil for 3 to 6 months without warping or sagging.

Print Method

Direct UV print (ink bonded to the plastic surface and cured instantly by ultraviolet light).

Produces a scratch-resistant, waterproof finish that does not peel or bubble.

Color Output

Full-color CMYK (cyan, magenta, yellow, and black combined to reproduce any brand color).

No spot-color limits on your design layout.

Finishing

H-stakes or grommets available. H-stakes slide into the corrugated flutes. Grommets are metal-rimmed holes for hanging.

Size Range

Custom sizes available. Signs over 48 in wide use horizontal flutes (the hollow channels running through the plastic) to stay rigid.

Indoor/Outdoor Rating

3 to 6 months continuous outdoor exposure. Deploy-and-retrieve use extends the same sign across roughly 1 to 2 years of seasonal cycles.

Single/Double-Sided

Single-sided for signs facing one direction. Double-sided for signs visible from both traffic directions on a road or walkway.

Flute Direction

Vertical flutes on signs up to 48 in wide. Horizontal flutes on signs over 48 in wide to prevent buckling across the wider span.
