

Product Specification Sheet

Custom Corrugated Plastic Yard Signs

Custom Corrugated Plastic Yard Signs run on 4mm Coroplast, a rigid waterproof fluted plastic sheet that's the lightest outdoor sign material we carry. Direct UV printing bonds ink straight to the surface for a tough, weather-resistant face. These signs are built for temporary outdoor use: ground-staked, fully custom, and ready in 1 to 2 business days.

Material

4mm corrugated plastic (Coroplast). A rigid, lightweight, waterproof fluted sheet stiff enough to stand upright in an H-stake without bowing.

Print Method

Direct UV print. Ink bonds to the sign surface and cures instantly, giving you a scratch-resistant, waterproof face that won't peel or bubble.

Color Output

CMYK full-color. Cyan, magenta, yellow, and black combine to reproduce any logo, photo, or gradient across the full sign face.

Finishing

Grommets or H-stakes available. Grommets are metal-rimmed holes for rope or zip-tie hanging. H-stakes slide into the flutes to hold the sign upright in soil.

Size Range

Custom sizes up to 4 ft x 8 ft. Standard sizes include 12x18 in, 18x24 in, and 24x36 in.

Indoor/Outdoor Rating

3 to 6 months continuous outdoor exposure with H-stake ground placement. Deploy-and-retrieve cycling extends usable life to roughly 1 to 2 years across multiple uses.

Single/Double-Sided

Both available on every order. Double-sided is the right choice for signs visible from both traffic directions.

Flute Direction

Signs wider than 48 in have horizontal flutes. Signs 48 in wide or narrower have vertical flutes. Order H-stakes matched to your sign width so the stake inserts correctly.
